App Navigation

Overall Risk Rating & Review Now Button

The Overall Risk Rating is a live representation of how many applications installed on your device have sensitive or high-risk permissions granted.

Tapping the "Review Now" button directs you to the Apps page, where you can review the installed applications and their permissions.

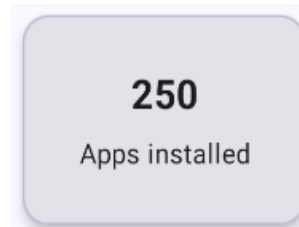

Permission Statistic Blocks

"Since Last Review"

This block informs you when the last time you accessed PermiCheck was.

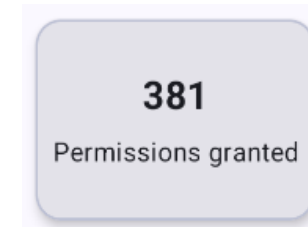

This lets you know how long it has been since you reviewed your permissions.

"Apps Installed"

This block informs you of how many applications are installed on your device.

Tapping this block directs you to the applications page.

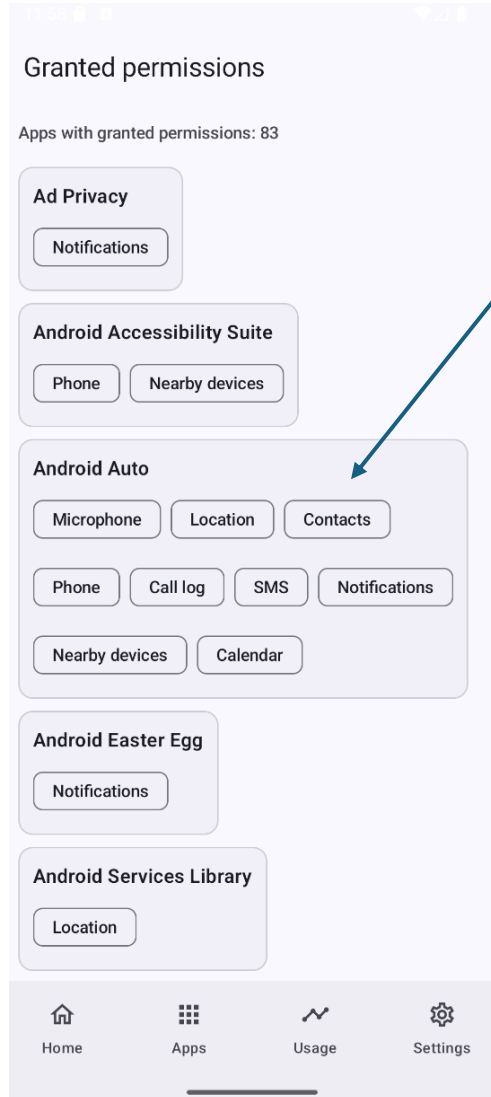

"Permissions Granted"

This block informs you of how many permissions have been granted on your device overall.

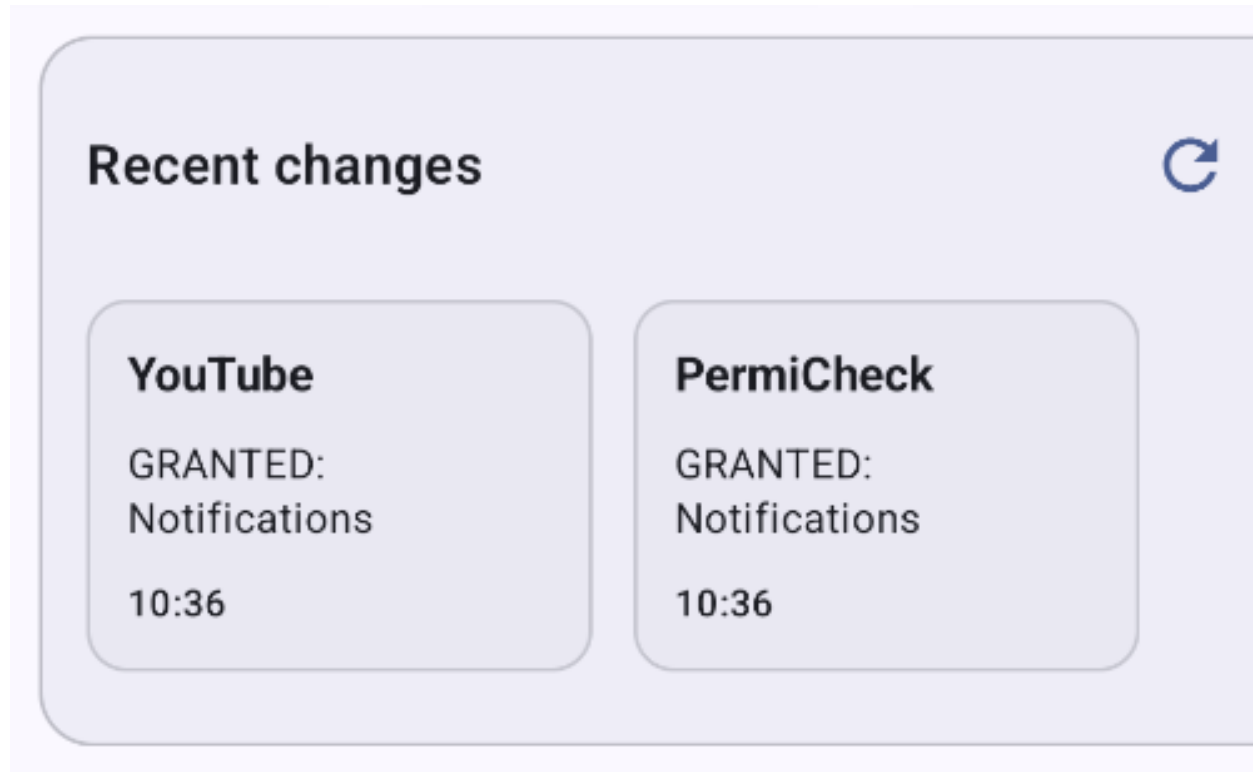

Tapping this box directs you to a page displaying each permission and what application it has been granted to.

Permissions Granted Page

Tapping on the application within the permission directs you to the corresponding application card in the apps page.

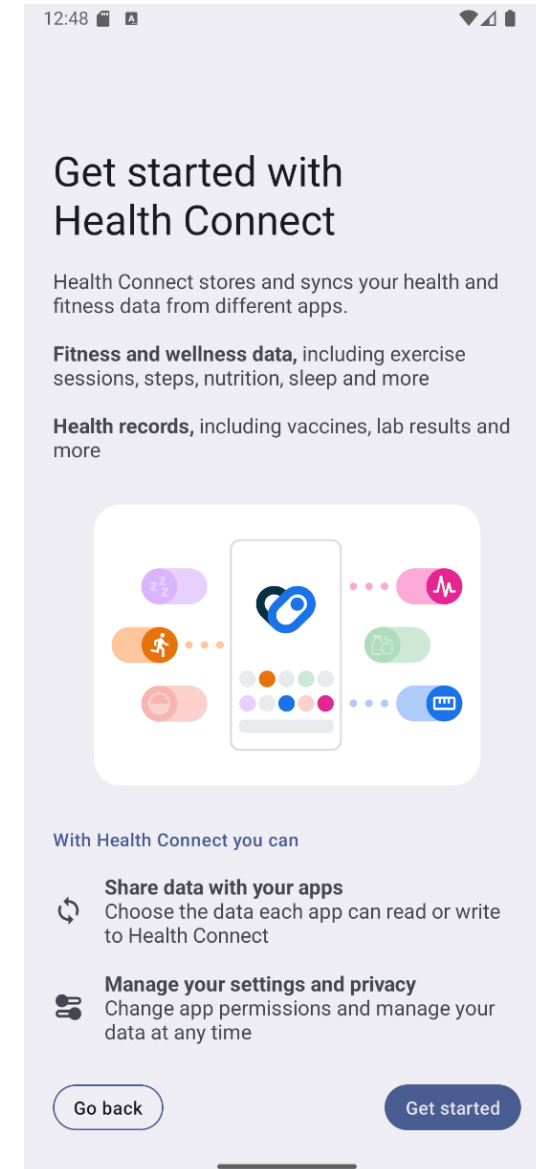

Recent Changes

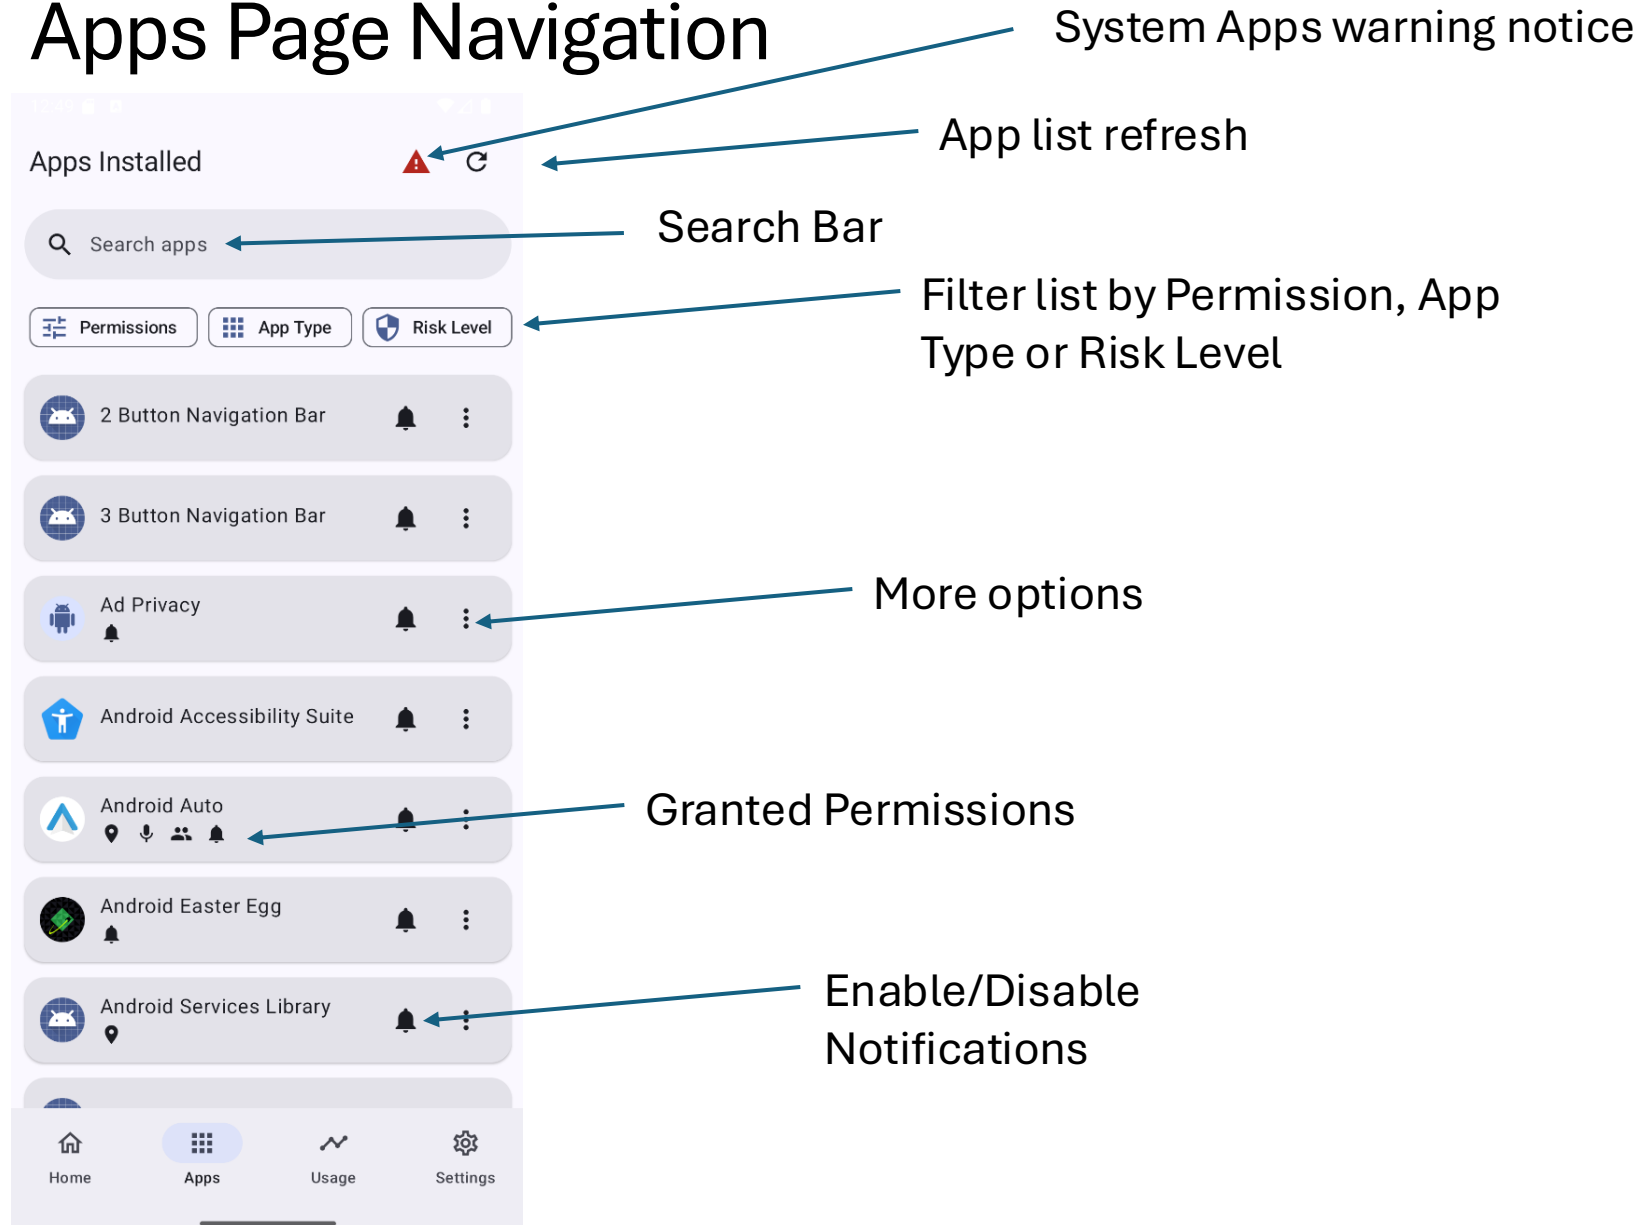

The "Recent Changes" box displays the latest application permission changes; this includes granted access and revoked access for applications.

Health Connect

Tapping the "Health Connect" button directs you to Android's Health Connect System, allowing you to control your phone's access to fitness and wellness data, as well as health records.

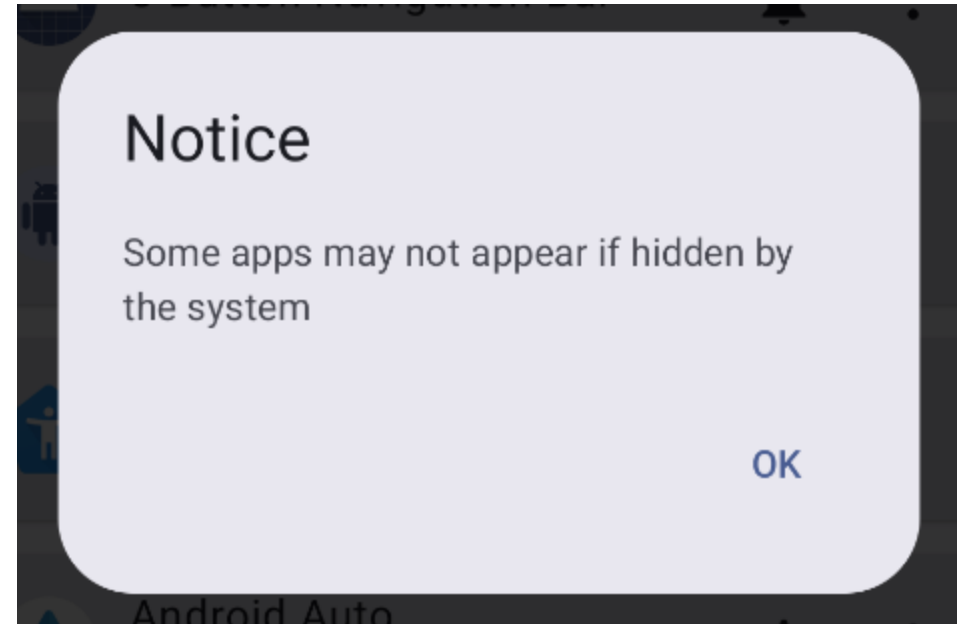

Apps Page Navigation

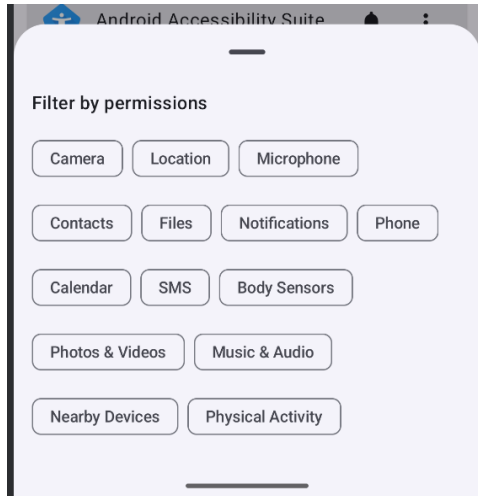

System Apps Warning Notice

Tapping this warning icon displays the following message, informing you that some apps may not appear if they have been hidden by the system.

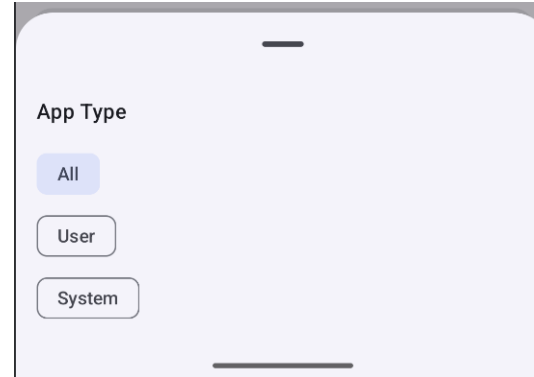

List Filters

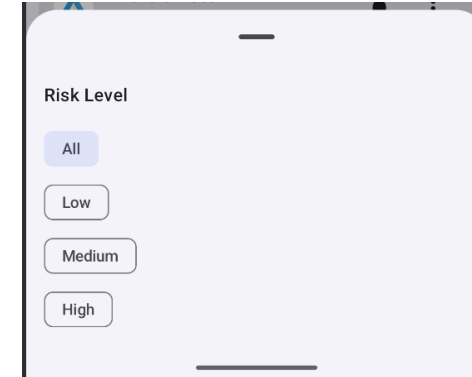

"Filter by permissions"

Filters applications by what permissions they have been granted.

"App Type"

Filters applications by whether they are a downloaded or built-in application.

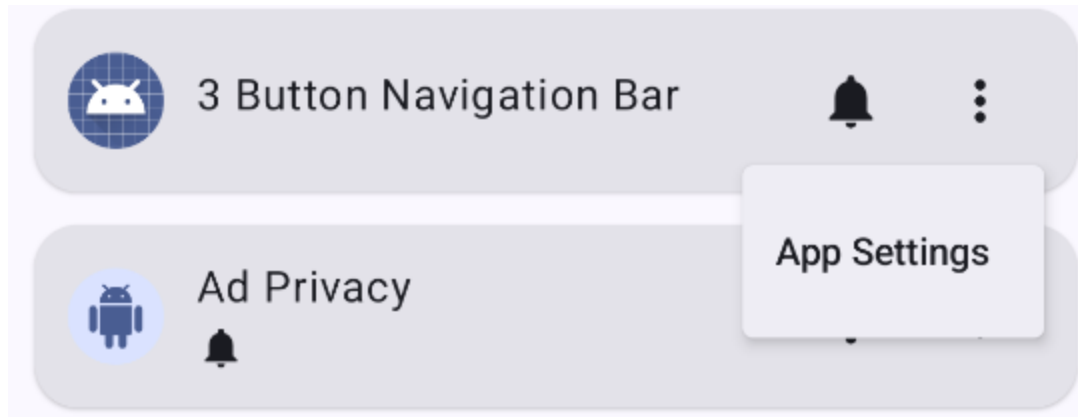

"Risk Level"

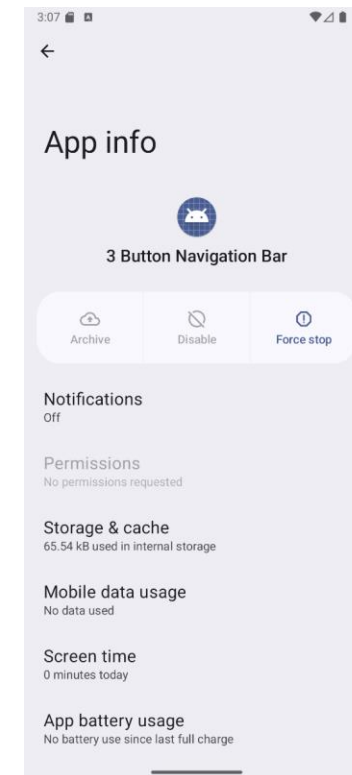

Filters by what level of risk the applications have.

More Options

Tapping the more icon next to an app card, brings up a prompt to select App Settings.

This brings you to the Android settings menu where you can modify permissions, archive the application, disable it, uninstall it, and force stop it.

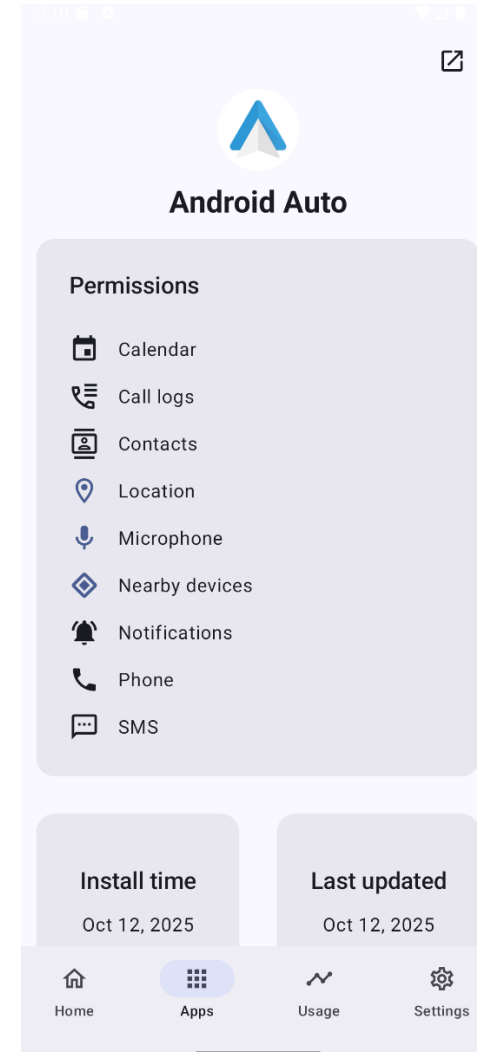

Granted Permissions

The icons under an application name correspond for the permission they have been granted.

Tap the application for detailed info.

For example: we can see that Android Auto has been granted access to the calendar, call logs, contacts, location, microphone, nearby devices, notifications, phone, and SMS.

Usage Tracking

When navigating to the "Usage" menu, you will be prompted to open Android settings and allow PermiCheck to access your usage access data.

Please tap "Open Settings" and follow the prompts to allow access.

Usage Access Required

To view app usage data, please enable Usage

Access for PermiCheck in system settings.

[Open Settings](#)

App usage data

PermiCheck

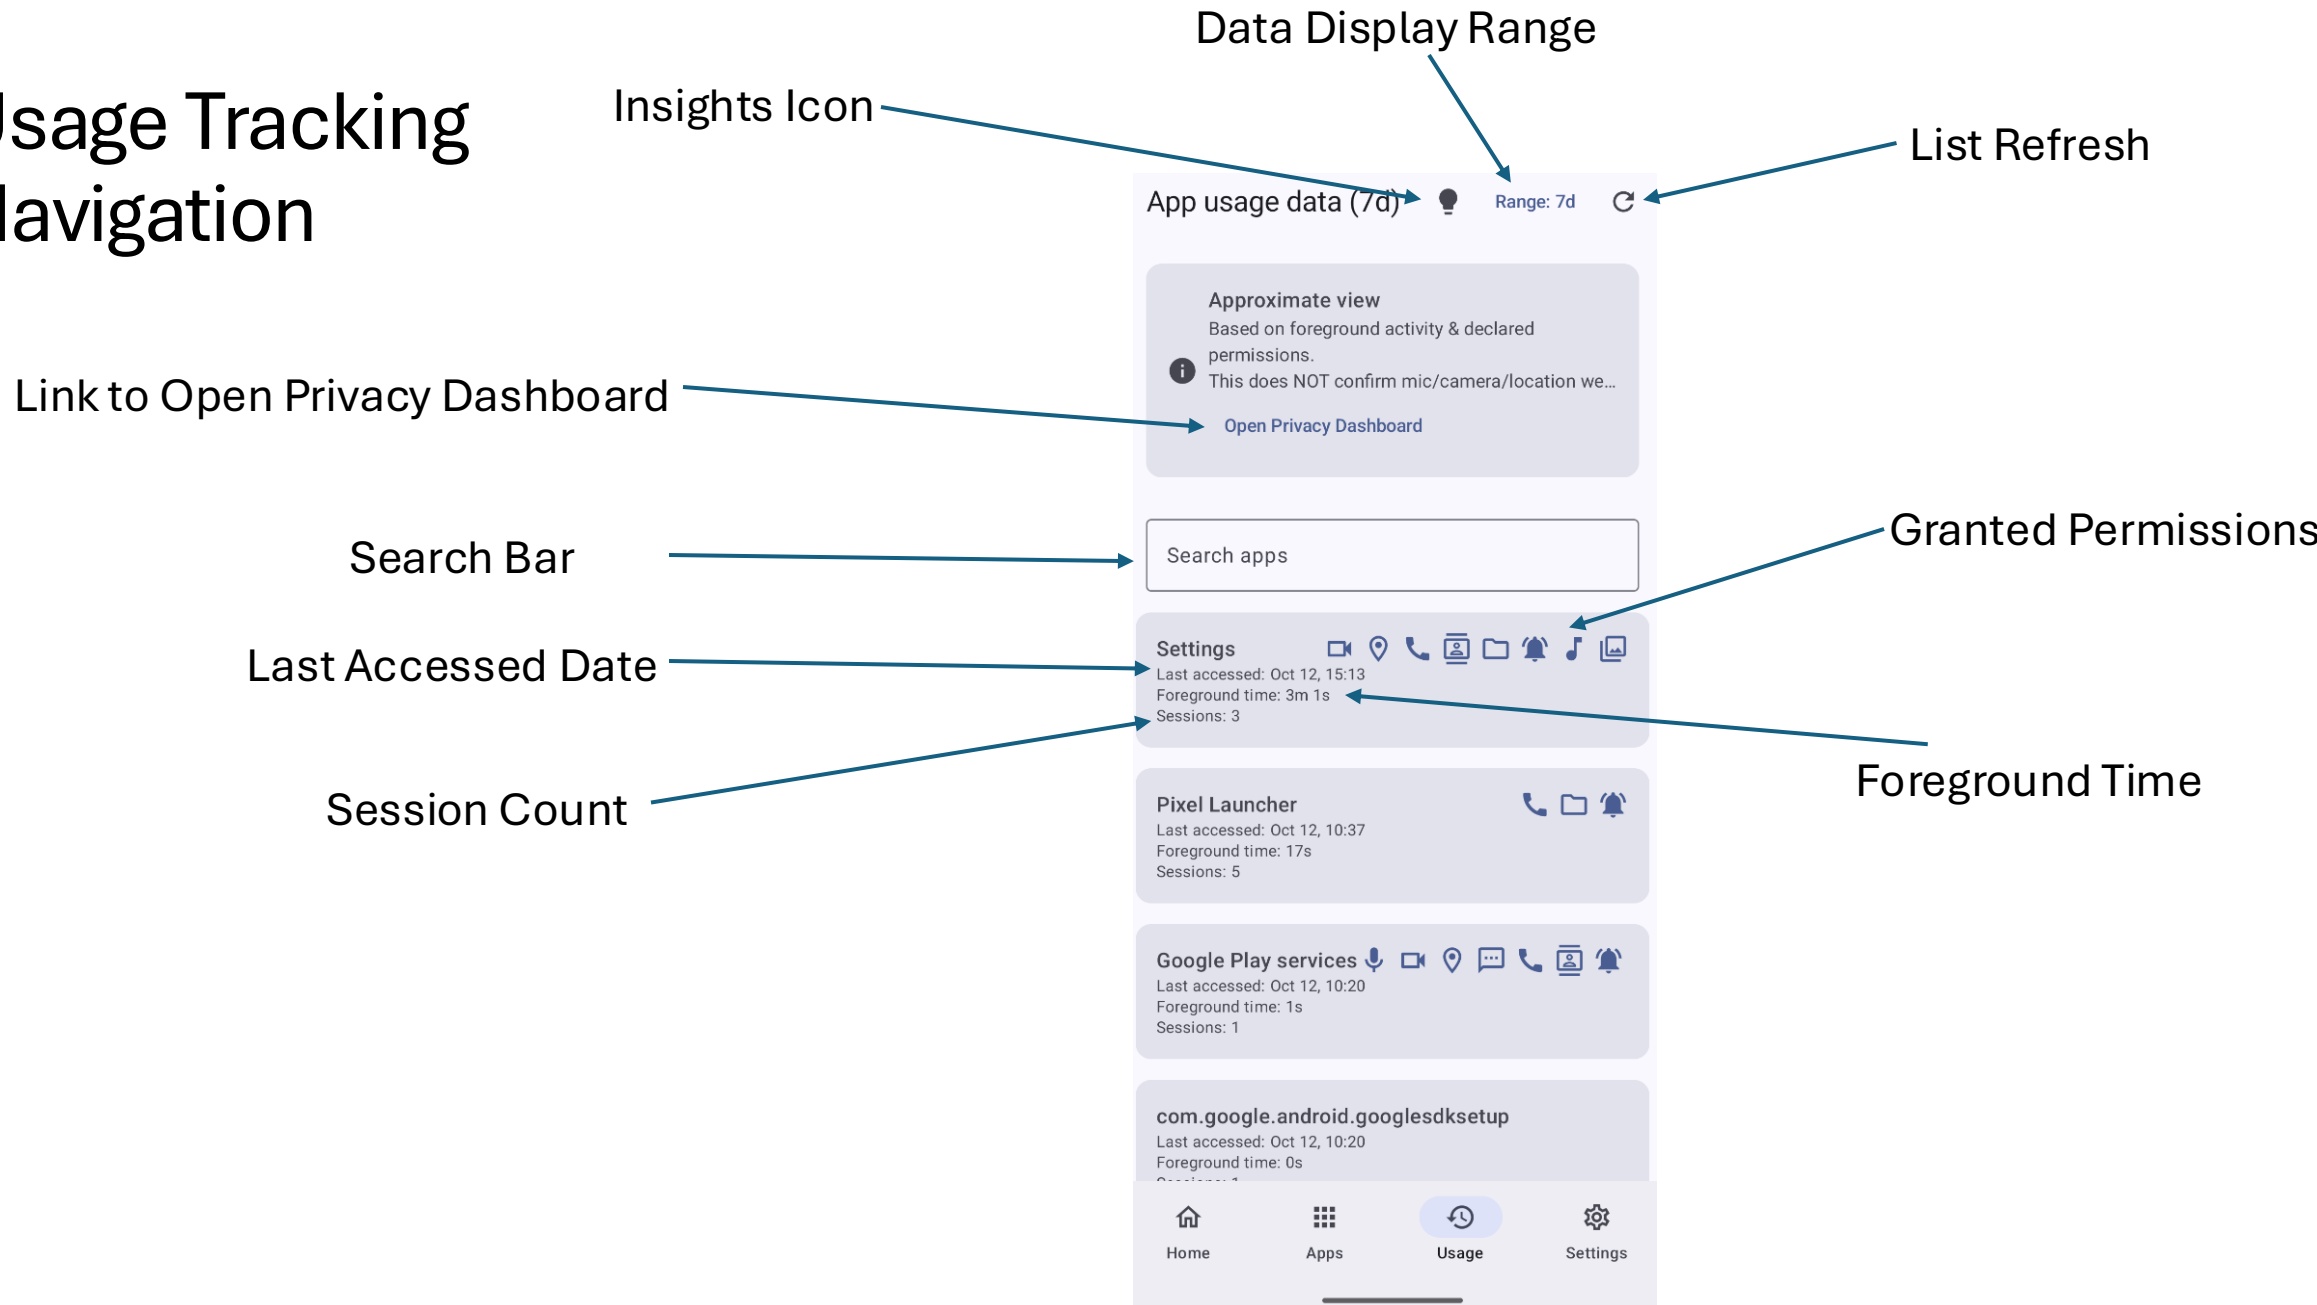

1.0.1

Permit access to app usage data

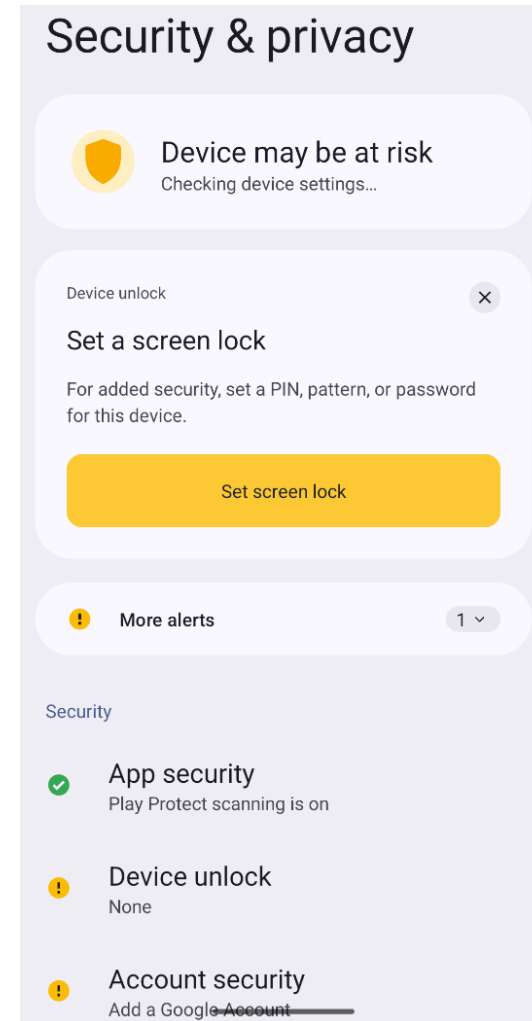

App usage data allows an app to track what other apps you're using and how often, as well as your carrier, language settings, and other details.

Usage Tracking Navigation

Privacy Dashboard

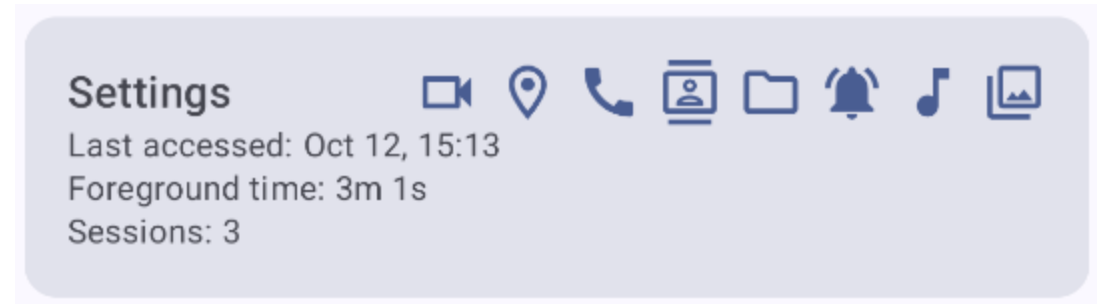

Tapping the "Open Privacy Dashboard" icon brings you to the Security & Privacy menu, where you can exercise greater control over various privacy and application permissions.

App Card

Each application card will inform you of the following:

- What permissions an app has (via the icons)
- When the application was last accessed
- How long the application was active in the foreground
- How many active sessions there have been of the application

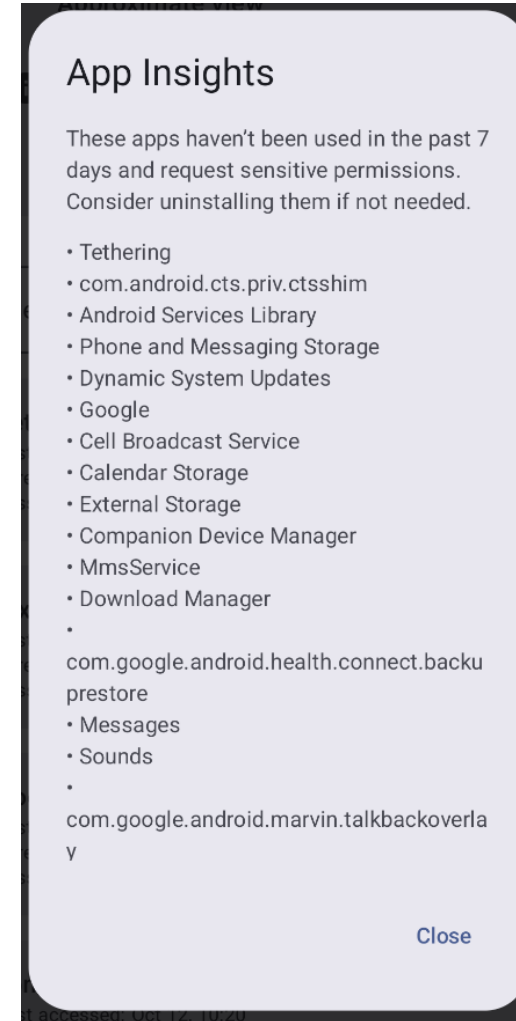

Permission Insights

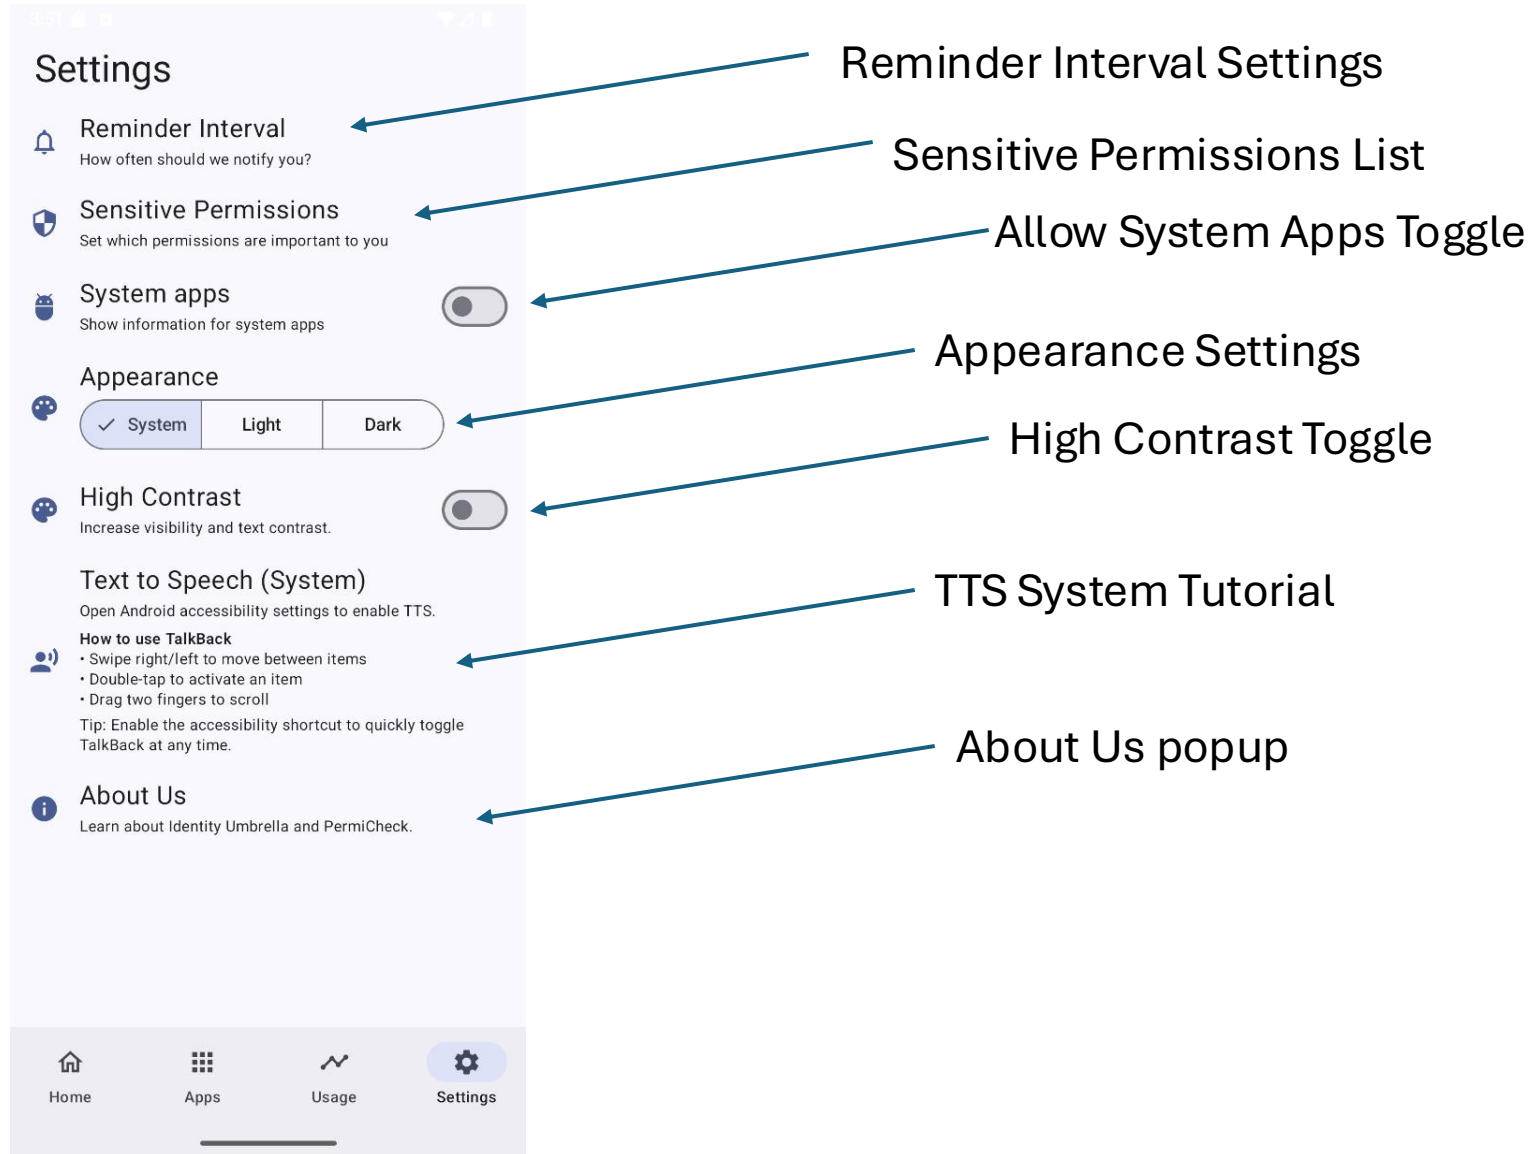

Tapping the bulb icon displays the app insights list.

This is a curated list based on the usage tracking data, giving you recommendations on applications to review.

For example, it may recommend altering the permissions of the "Messages" app because you have not used them in a while, and by doing so, will reduce the security risk.

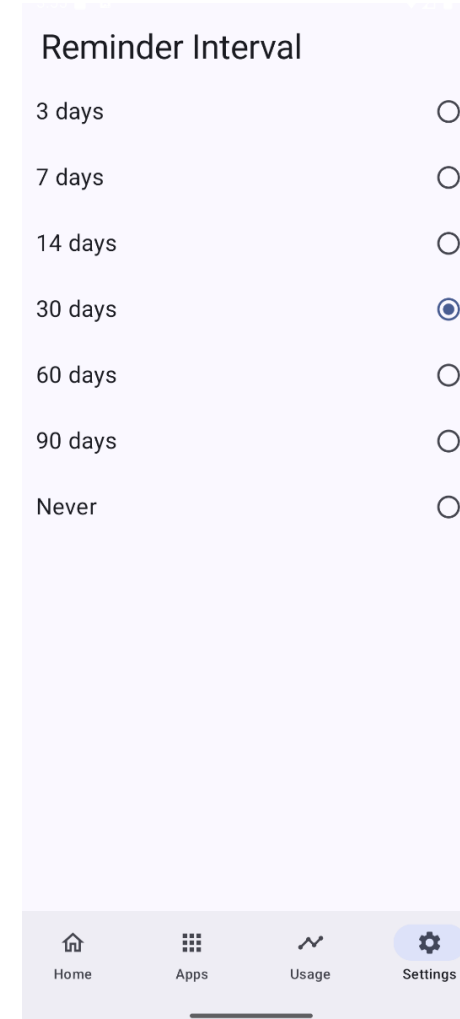

Settings Page Navigation

Reminder Interval

Tap "Reminder Interval" to select how often you would like to be reminded to check your permissions from PermiCheck.

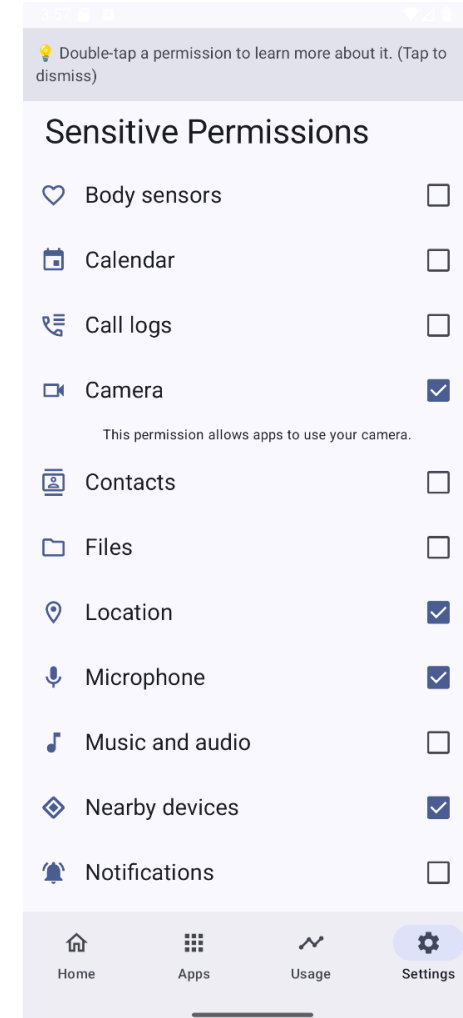

Sensitive Permissions

Open the "Sensitive Permissions" menu to manually select which permissions you want to be marked as "high-risk".

By default, some permissions have been set to always be high-risk, so you can leave everything unticked if you wish.

These selections affect what applications are counted towards the "Overall Risk" in the homepage, and the "high risk" filter in the Apps page.

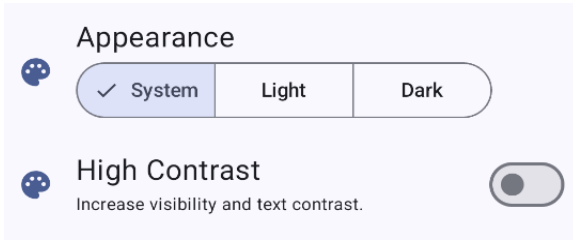

Double-tap a permission to learn more about it.

System Apps Toggle

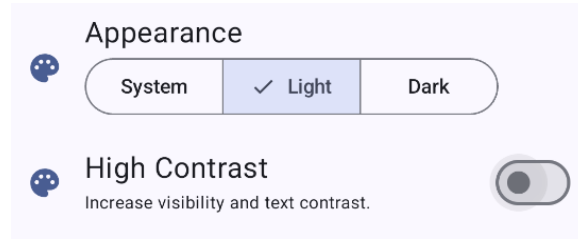

Enable this option for system applications like Android Auto to be included in the apps list in the Apps page.

Appearance Options and High Contrast Mode

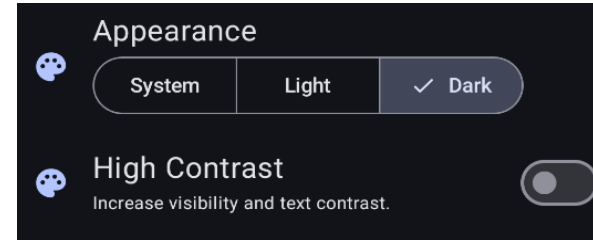

"System"

Changes appearance to match Android system theme.

"Light"

Changes appearance to a white/blue colour scheme.

"Dark"

Changes appearance to a charcoal/blue colourscheme.

"High Contrast"

Changes appearance to a true black and white colour scheme.

Text-to-Speech System

Tap this option to navigate to Android's "TalkBack" text-to-speech system, enabling users with ocular issues to use the app without looking.

Text to Speech (System)

Open Android accessibility settings to enable TTS.

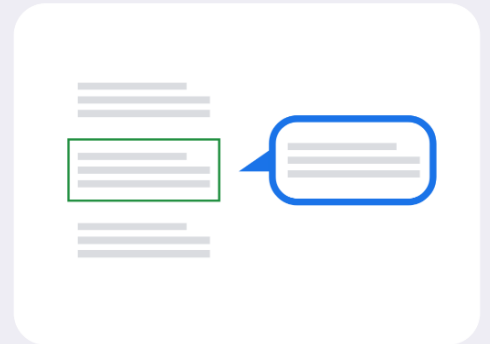

How to use TalkBack

- Swipe right/left to move between items
- Double-tap to activate an item
- Drag two fingers to scroll

Tip: Enable the accessibility shortcut to quickly toggle TalkBack at any time.

← TalkBack

TalkBack provides spoken feedback so that you can use your device without looking at the screen. TalkBack can be helpful for people who have difficulty seeing the screen.
